

Portable RO CIP Tank

Clean-In-Place Tank for Portable Reverse Osmosis Systems

Designed for Clean-In-Place applications, Mar Cor Purification's CIP tank features a light weight, stable construction and spill proof lid. The tank reduces chemical odors and provides the user quick connect ports for convenient attachments.

Standard Features & Benefits

- Dedicated for Portable RO machines
- Designed exclusively for Clean-In-Place applications
- Built-in Dip Strip test site to verify success
- Used for many MCP models making it multipurpose
- Light-weight with plastic hinge and wide grip handle
- Secure, locking style lid, prevents splash and reduces chemical odors
- Stable design, spill-proof
- Sealed lid helps reduce chemical odor
- Pop-up hinged lid to conveniently add chemical or drain contents
- Basic instruction labels with indicator water fill lines including chemical volume addition information
- Quick connect ports for product, waste and disinfect ports
- Complete with 2 hoses (4 ft long) with connectors (waste and disinfect)*

Product Specifications

CIP Tank

Part Number	3027542
Overall Dimensions	10.5" H x 12" W, x 12" L
Capacity	2.5 gallons (9.5 liters)
Tank Material	Polyethylene

Mar Cor Purification Medical Water Products

PTG-520[®] Carbon Filtration System

Compact Carbon Filtration System for Portable RO Systems

The compact PTG-520 Carbon Filtration System is a new option that is now available to owners of portable RO systems. The PTG-520 system is lighter, has a lower profile and is cost effective. The PTG-520 carbon block filter has been tested to meet specific regulations pertaining to the use of carbon as detailed in ANSI/AAMI 13959 and specifically Annex F & G. The Carbon Filtration System is a design that includes 2 carbon block filters in series and is engineered and manufactured to be clean by design.

MINNCARE[®] HD Disinfectant

Protect Both You and Your System

Minnicare HD is the first chemical disinfectant to receive a FDA 510(k) clearance for the disinfection of water purification systems for hemodialysis. Minnicare HD is a peracetic acid solution developed specifically for use on hemodialysis reverse osmosis (RO) membranes and their associated distribution systems. Peracetic acid formulations were developed by Minntech Corporation (Medivators Inc.) in 1976 and are currently being used in a wide variety of applications. Mar Cor Purification distributes Minnicare HD Disinfectant throughout the renal community.

Posiclear Capsule Filters

Bacteria & Endotoxin Control For Portable RO Systems

The Posiclear capsule filter is FDA 510(k) cleared and is uniquely designed to remove bacteria and pyrogens that may be present in product water used for hemodialysis applications. The Posiclear filter is manufactured with a positively charged pleated Nylon 6.6 filter membrane and removes bacteria and endotoxin from the liquid by size exclusion and adsorption mechanisms. To help keep the water system clean, the filter is compatible with hot water (90°C) and peracetic acid disinfection procedures.
