

Mar Cor Purification Life Science Products

Quebec Service Center

Mar Cor Purification Life Science Products

Corporate Profile

Mar Cor Purification is a leading provider of complete water treatment systems and services for the Medical, Pharmaceutical and Life Science Markets. For over 40 years and over 1000 installations, Mar Cor Purification has been providing high purity water solutions to industry leaders in these sectors. Mar Cor Purification is owned by Cantel Medical Corporation, A New York Stock Exchange listed Company (CMN). The Quebec Service and Regeneration Centre is part of a network of 27 MCP offices and 6 regeneration plants located across Canada and the US and features a qualified team of Mar Cor Purification Field and Service Technicians.

Mar Cor Purification Water Treatment Capabilities

- Reverse Osmosis (RO)
- Water Softeners
- Carbon Filters
- Media Filtration
- Electrodeionization (EDI)
- Service Deionization (SDI)
- Ultrafiltration
- Ultraviolet Purifiers
- Depth/Pleated Filtration
- Ozone Disinfection Systems
- Cleaners & Sterilants
- PLC/HMI Control Systems

Pretreatment Systems

Pretreatment for Lab Research and Medical Applications

BioPure LSX

High Efficiency USP High Purity Water System

Products & Services

High Purity Water Systems

Mar Cor Purification (MCP) is an industry leader in high purity water systems for Medical, Pharmaceutical, Semiconductor, Commercial & Industrial, and Lab Water applications.

- Single-source provider of installed water purification systems
- Design & Engineering Services
- Standard and custom modular systems, including skid mounted
- Integrated PLC based control systems
- Superior designs proven to minimize bacteria growth
- "Green" options for water recovery and energy efficiency

Central Dialysis Water Systems

We provide a comprehensive line of medical device RO machines designed to meet your clinic's needs for production output and monitoring capabilities.

- BioPure HX2 System - Double Pass Water Purification System with Automatic Heat Disinfection
- 4400M RO System - Basic controller, compact frame, large capacity
- 23G RO System - Push button simplicity, digital readouts, service friendly

Portable Dialysis Water Systems

We offer a comprehensive line of portable RO machines designed to meet your acute and home program needs. These medical device RO machines are designed to provide reliable production output with full monitoring capabilities.

- Millennium HX - RO with isolated automatic hot water disinfection capability.
- 700 Series - Several models, wheel based, room for pretreatment.
- M2 ERGO & M1 Carts and Docking Stations of various sizes and models.

Service Deionization (SDI)

Mar Cor Purification offers portable exchange activated carbon and deionization services. All portable exchange medias are processed in our regulatory compliant facilities.

- No capital investment required.
- Monthly, Quarterly or Semi-Annual Services available.
- Premium grade carbon and ion exchange resin medias (cation, anion or mixed bed).
- Flow rates from 0.25-100 gpm. Additional flow rates available with parallel units.
- Quality controlled, Compliant and Consistent.

Mar Cor Purification Support Services

Mar Cor Purification (MCP) is one of the largest and most experienced water purification companies in North America. We have been servicing water treatment equipment for over 40 years and have an experienced team of technicians qualified to work on your water systems based out of our Montreal, QC office. Key services offered include:

Engineering and Design Services

Working with our clients, in a collaborative engineering and design effort, ensures the delivery of equipment properly designed to meet your needs. MCP provides fully integrated services so that the system you purchased meets your requirements.

After Care Services

Once installed, MCP preventative maintenance contracts and services safeguard the continued production of high purity water. MCP is available 24/7 to provide you emergency and scheduled support services to keep your system operating at peak efficiency including:

- Periodic service by qualified technicians to ensure consistent performance and protection of your capital investment
- Analytical testing by independent laboratories to stay compliant
- Periodic system cleaning and sanitization to maintain high quality standards
- Regular equipment calibrations to NIST standards

Equipment Installation

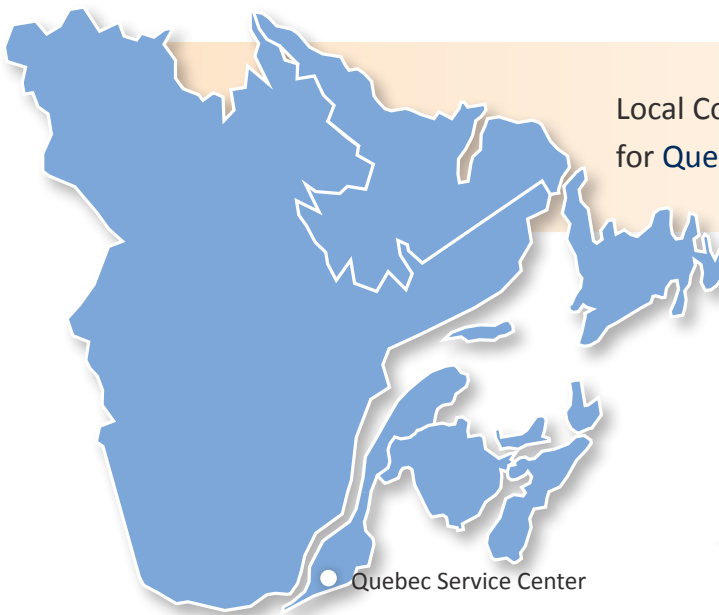

- System Start-Up
- In-Depth Operator Training
- Storage & Distribution Piping Systems

Maintenance & Repair

- Diagnostics and Repair Services
- System Performance Audits
- Preventive Maintenance

Engineering Services

- Validation Documentation
- Engineering Documentation
- Project Management
